

WEBSITE HOSTING SERVICES

Effective from 1st March 2025

In general terms, most clients/projects will require a domain (eg yourwebsite.com) which points to (1) your website which is hosted on a server and has an SSL certificate attached to it, and (2) a mailserver which hosts your email accounts.

DOMAINS

Fully managed domain registration including DNS updates. Costs per year shown.*

.com	£29	.co.uk	£19
.org	£32	.org.uk	£19
.uk	£19	.online	£76
.info	£59	.store	£119

There are hundreds of different top-level domains (TLDs) available, pricing available upon request.

EMAIL

We offer a range of email services including standard accounts with multiple storage capacities, forwarders and archiving. Costs per month shown (per email account/address).*

Standard Mailbox (2GB capacity)	£1
Medium Mailbox (12GB capacity)	£5
Business Mailbox (50GB capacity)	£8
Email Forwarder (no mailbox storage)	FREE

HOSTING

Aqueous offers fully managed WordPress website hosting. This means we take care of everything, and our clients don't need to navigate technical control panels. Costs per month shown.*

Shared Hosting (per website)	£16
Dedicated Hosting (per website)	£30
Simple SSL Certificate (domains using IONOS nameservers)	£4
Business SSL Certificate (domains with emails hosted elsewhere)	£9

HOSTING EXPLAINER: Your website (files and database) is stored on a server connected to the internet so users can access it. The server has storage and processing limits.

Shared Hosting means your website shares the server resources with several other websites. **Dedicated Hosting** means your website benefits from all the server resources.

An **SSL Certificate** is required to prevent your website carrying an **insecure warning**.

Hosting is billed 6-monthly in advance. SSL certificates are billed annually in advance.
